PROJECTS

Portfolio Website — 2019

Made with: ReactJs, Redux, HTML5, CSS/SASS, Webpack

An interactive portfolio website that showcases my recent projects, skills, and technical experiences.

Event Planner — 2019

Made with: ReactJs, Redux, NodeJs, ExpressJs, HTML5, CSS/SASS, SQLite, Sequelize, Jest, Webpack

A web application that lets users create and manage events, including the attendees, and items needed for the events.

Budget Planner — 2018

Made with: Python, Flask, HTML5, CSS3, Javascript, MySQL

A program that takes a percentage of a user's money, serving as the spending money, which is then split and allocated to items the user would want to buy, prioritizing items with a higher desire.

Healthy Campus Initiative — 2018

Made with: HTML5, CSS3, JQuery, PHP

Website created for the University of California, Irvine Institute for Clinical & Translational Science, focusing on easy accessibility to all available health resources that the school offers for both students and staff.

EXPERIENCE

APRL, Los Angeles, CA — *Front-End Developer Intern*

APRIL 2019 - PRESENT

- Translated design team's mockups into responsive, interactive features, using ReactJs.
- Maintained brand standards under company guidelines.

The Fox Magazine, Remotely — *Web Intern*

AUGUST 2018 - MARCH 2019

- Implemented front-end prototype for their event website using ReactJs.
- Introduced wireframing and information architecture concepts to increase productivity.
- Identify and change the website's content to better the overall user experience.

University of California Irvine, Irvine, CA — *Front-End Developer Intern*

JANUARY 2018 - JUNE 2018

- Created front-end prototype for all their health-related campus resources using HTML/CSS, and Javascript.
- Constructed custom PHP classes for conveniently parsing backend information.
- Conducted user interviews and built personas based off those users.
